

**CONSENT/AGREEMENT FOR PENDING LAB RESULTS  
FOR STORAGE OF SEMEN**

This is an addendum to the agreement entitled "Consent/Agreement for Cryopreservation and Storage of Semen." This addendum is used in case there are no blood screening results at the time of semen collection and storage. FCC will keep your cryopreserved/ stored semen samples for a period of up to 3 weeks with pending results. This means that if by the end of 3 weeks from the first sample deposited, the results are not at our office or that the results are positive for any one test, then FCC will dispose of all your samples and you will be responsible for only one month's storage. Due to confidentiality issues, please be advised that it is your responsibility to ensure that the results are received in our office by the end of this allowable time period.
